

PERSONAL RECOMMENDATIONS:

“She trained the top management and other selected groups from the middle management of our company. What I realized as a very important and noteworthy result, she had started a building of common company culture, vertically and horizontally compact, what had never been done before at such a systematic and efficient level. That system of common objectives, values and communication rules has been set and is still alive and spontaneously “maintained” by ourselves, even though some years passed and many new people came from the time of her trainings.

I attended a set of trainings specified for the top management of the company Bongrain SK. I appreciate above all the themes of project management and personal aspects of team management, which I have applied in in my daily work. I am especially thankful to her for individual cogent advices how to improve and make more efficient my personal methods of management.

I can remember her trainings were interesting, interactive, full of cogent ideas and examples, undoubtedly thanks to your professional and personal competencies. And I have known my opinion is rather similar to the mind of other participants.”
